

## Reflection on Watershed Project

1. What issue in your watershed did your video address?

Storm water pollution and the water quality in the Los Peñasquitos Creek

2. What was the message of your video?

Prevention of storm drain pollution to mitigate issues present in our watershed

3. Describe your role in creating the video.

I was the “director” of our group who delegated work and was appointed to oversee everyone’s work to help contribute to the final product. I also did the majority of finalizing the video and organizing field trips to the watershed

4. What grade would you give yourself?

“A+” for my leadership and project management skills
